1 MR. CHAVEZ: Could I add something? Lee Chavez. I do think that tribes do need funding to get their expertise on the manner that all this documentation is written. It's highly -- how should I put this -- to the common person it's -- loss for words. Anyway, the way the documentation is written we need expertise to go through it and dissect and give their opinions to the tribal councils and go from there. Without funding, this will never be done.
